# A Hemorrhage Without Consequences

When it became impossible to do surgery, the doctors opted to leave it to nature, having a 50 percent chance that the hemorrhage would absorb naturally.

05/01/2017

On March 10th of this year, my 80-year-old sister Dolores suffered a cerebral stroke. She was immediately

admitted to the ICU of a hospital in Alicante (Spain).

The doctors located a blood clot, but as its placement made it difficult to reach, they decided to give her an anticoagulant. As a result of this, my sister suffered a serious brain hemorrhage.

As it had become impossible to perform a surgery at this point, the doctors opted to let nature act, with a 50 percent chance that the hemorrhage would be absorbed naturally.

It was at this point that I sought the intercession of Guadalupe Ortiz in a continuous way throughout the days of that crisis.

Today, my sister is in the process of a healthy recovery: she speaks, moves, and eats in a normal way. I would like to share this story with everyone, and I consider it a favor

from God through the special  
intercession of Guadalupe.
