

Her cough disappeared

We took her to the doctor three times but none of the medicines cured her cough.

04/04/2015

In February my four-year-old daughter fell sick. We took her to the doctor three times but none of the medicines cured her cough. At night she used to cough for three hours non-stop. Early one morning, in desperation, I got a prayer-card of St. Josemaria and rubbed her with it. I prayed with all my heart to St.

Josemaria that her cough would get better. Then I took her back to the doctor, having prayed the prayer of St. Josemaria first. Three days later my daughter was completely well. I am enormously grateful to St. Josemaria. My family and I have a lot of faith in him.
