Pain in My Right Knee

A favor shared by someone who sought Guadalupe's intercession after feeling a sharp pain in their knee.

05/14/2018

One day I began to feel acute pain in my right knee that wouldn't go away and that seemed to be coming from the meniscus.

As I didn't have health insurance yet, it was difficult for me to seek out medical assistance.

So I began to pray to Guadalupe, a person to whom I have had a particular devotion ever since I read about her life, and the pain disappeared. Now I can bend my knee, and my life has gone back to normal.
